STEWARDS

-21- Concerning the importance of the stewards.

The stewards are important members of organisation, they can support the members of F.I.P.S.e.d.'s Executive Committee, monitoring the anglers and ensuring that the rules are followed.

The second signal shall indicate that 5 minutes are left before to start the baits and ground baits control.

The third signal shall indicate to start the baits and ground baits controls (1 hour before heavy ground baiting). The control starts from the peg n° 1 of each sector or from the first peg of each sub-sector.

The fourth signal, shall allow anglers to start heavy baiting (10 minutes are allowed for this task).

-24- Weighing criteria

- a) Weights shall be recorded in grams.
- b) When one or more competitors have caught very small fish that are not recorded by the scales (weight equal to 0 grams), it is necessary to record the number of catches made by each of these competitors in order to classify them according to the number of fish caught; in any case, these competitors will be listed at the end of all the others classified according to weight.

-25- The weighing operations shall be performed by, at least, 5 main stewards. The tasks of each stewards are the following:

- a) Steward number one shall be responsible for weighing, making tara every peg or confirming that weighing starts from zero and taking care of scale and weighing bag.
- b) Steward number two is responsible for the bucket and landing net, helping the angler to transfer the fish from keepnets to landing net inside of the bucket. After to confirm that all fish was removed from keepnet, this steward transfer the fish from landing net to the weighing bag.
- c) Steward number three shall write down the weights in the official record or APP, asking the angler to confirm and sign.

RANKINGS

- 27- **Under no circumstances should a sector have more than 19 teams. If are present more than 19 or 38 teams, the sector will be divided in two or three sub-sectors, respectively (if there are 20 teams in the sector, that will be divided into two sub-sectors of 10 competitors each, while if there are 39 teams in the sector, that will be divided into three sub-sectors of 13 competitors each).**

- a) Ranking by sector or sub-sector shall be drawn up based on the weight (1 point per gram).
- b) The competitor who recorded the highest weight shall be given 1 point, while 2 points shall be attributed to the second one, and so on.
- c) **If the sector is divided into sub-sectors and the number of teams is odd, the ranking of the angler in between both sub-sector will be ranked by sector on the left. But his weight also counts for the ranking of the sub-sector on the right, and this position should not be considered.**
- d) In the event of a tied score (same weight) in the same sector or sub-sector, the anglers concerned shall obtain a number of points equalling the average placing they should have had (example: two competitors with same weight placed in 5th position, they will obtain $(5+6)/2 = 5.5$ points each; if instead of tie with two anglers, we have tie of three or four anglers, we must follow the same criteria.

Example: three competitors tying in the 8th position, the average will be $(8+9+10)/3 = 9$ points, and so on).

- e) An angler who have not caught any fish will receive the number of points equal to the last of sector or sub-sector.

If we have more than one angler, in one sector or sub-sector with no fish we follow the same rule for a tie: each anglers will receive the number of points equal to the average of non-attributed places in their sector or sub-sector (example, 18 anglers, 12 caught fish and they will be placed at the first 12 places, points from 1 to 12. The remaining anglers from 13th to 18th positions will get the average of points $(13+18)/2 = 15.5$ points each).

The cancelled leg shall not be considered when making the rankings, which shall be established based on the results of the held leg. The cancelled leg shall not be held at a later stage.

2- IF BAD CONDITIONS BREAK OUT DURING THE LEG

The leg shall immediately be stopped (a 1st signal will be emitted by the organisers) and all competitors shall take shelter outside the pegs (red card). If the weather or water-related conditions allow, the leg shall then continue and a 2nd signal shall inform the anglers that they may return to their pegs; a 3rd signal, 5 minutes later, shall authorize the competitors to resume angling (heavy ground baiting is forbidden).

Maximum 2 breaks shall be authorised in one leg, and their overall duration shall not exceed one (1) hour; otherwise, the leg shall be stopped for good.

The Jury may shorten the duration of a leg if the competition schedule does not allow angling for 5 hours.

A leg shall be validated if it lasted at least 3 hours. The break(s) time shall not be considered when calculating the duration of a leg.

Should the weather or water-related conditions not allow to duly carrying out a competition, the Jury may decide to cancel one leg. Said leg shall not be postponed and the ranking shall be drawn up based on the leg that was actually carried out. The cancelled leg shall not be held again.

ANTI-DOPING CONTROLS

-36- F.I.P.S.e.d. adopts the World Anti-doping Code applied by C.I.P.S.

During a championship, the anglers selected to undergo anti-doping controls shall imperatively go to the designated place at the indicated time, following F.I.P.S.e.d.'s or the Jury's guidelines. Any angler selected to undergo anti-doping checks who does not report for the controls shall be disqualified from the competition and shall be given a penalty corresponding to the bottom rank in the ranking + 1, for all the competition days he participated in (red card).

Cost of Anti-doping controls at the championships shall be borne by the organising nation. All contacts with the N.A.D.O. (National Anti-Doping Organisation) of each Nation shall be exclusively kept by C.I.P.S. as controlling authority.

The organisers shall be responsible for the fishing material and equipment of the angler drawn to be tested, while he is undergoing the anti-doping control.

C.I.P.S., in quality of Testing Authority, will issue the relevant mission order on the ADAMS System, with the concerned instruction for the doping control tests.

A copy of the Doping Control Form (DCF), signed by the Doctor who has provided the tests, must be sent to the C.I.P.S. Secretariat cipssecretariat@cips-fips.com or delivered immediately after the competition to the F.I.P.S.e.d. official delegate present on place, who will forward it to C.I.P.S.

The athletes participating in the Championships, by registering, implicitly accept all WADA anti-doping rules.

An athlete whose illness or condition requires treatment with a prohibited substance or method must apply to C.I.P.S. for a Therapeutic Use Exemption (TUE) following the C.I.P.S. strict TUE application process.

He/she shall then use the application form, which can be downloaded from the ITA website: <https://ita.sport/resource/international-testing-agency-therapeutic-use-exemption-tue-application-form/>

The TUE request has to be sent to the following address: tue@ita.sport.

Athletes must therefore consult the Prohibited List of substances: https://www.wada-ama.org/sites/default/files/2025-09/2026list_en_final_clean_september_2025.pdf.
